

# 2025 NJACCHO Tabletop Exercise Series

## Information and Registration

NJACCHO is sponsoring a series of four-hour tabletop exercises, made possible through a grant from the NJ Department of Health. These exercises will focus on response actions related to an infectious disease outbreak. While public health is the primary focus, an effective response in this scenario will involve emergency management, hospitals, school districts, and social services / human services agencies, all of which are invited to participate.

Each exercise will follow the same scenario. Participants are invited to attend whichever session works best for them, and all players will respond to the scenario as if it were in their jurisdiction. The purpose of these exercises is to promote multi-agency coordination, test current emergency response plans, and provide recommendations for future preparedness endeavors across the state. Locations, dates, times, and registration information for each are listed below.

Host	Location	Date	Time	Registration Link	Register By
<b>Bergen County</b>	Paramus Office of Emergency Management	March 25 <sup>th</sup>	9am-1pm	<a href="https://www.surveymonkey.com/r/NLSZNBV">https://www.surveymonkey.com/r/NLSZNBV</a>	March 18 <sup>th</sup>

## Capabilities to be Examined

PHEP	FEMA	HPP
Public Information and Warning	Operational Coordination	Health Care and Medical Response Coordination
Nonpharmaceutical Interventions	Public Information and Warning	
Medical Countermeasures Dispensing and Administration	Public Health, Healthcare, and Emergency Medical Services	
Information Sharing	Situational Assessment	
Emergency Operations Coordination		
Public Health Surveillance and Epidemiological Investigation		

## Exercise Objectives

1. Demonstrate multi-agency operational coordination and information sharing for an infectious disease outbreak.
2. Establish a risk communication strategy for public and media engagement during the incident.
3. Determine and implement medical countermeasures (MCMs) and nonpharmaceutical interventions to minimize the rate of infection within the population.
4. Utilize public health surveillance systems to guide epidemiological investigation.

## Additional Information

Public Health continuing education credit has been applied for.

This exercise has been designed to comply with the requirements of the CDC Public Health Emergency Preparedness (PHEP)/NJDOH Biological Incident 100 (BIO100) exercise. LINCS and CRI jurisdictions seeking to use this exercise to fulfill that requirement must participate in accordance with the [CDC PHEP Notice of Funding Opportunity: Exercise Framework Supplemental Guidance \(April 2024\)](#), must utilize the same scenario for their BIO200 exercise, and must include participants from public health, emergency management, environmental health, healthcare coalitions, and others from the jurisdiction.
